

Take soil tests this fall!

Write a Nutrient plan this winter!

Determine crop nutrient needs, take credit for manure and legumes, and figure out optimal amount of fertilizer to purchase and apply.

Basic soil tests will include results for:

Soil pH, organic matter, phosphorus, potassium

For more information:

Dodge County Land Conservation
Robert Bird (920) 386-3660

CCA-Certified Crop Adviser

Your CCA agronomist can help you get the information you need to grow your yield!
